

## **New England Packaging Leader Expands with \$7 Million Investment**

Lancaster, NH - 2/25/20 - PAK Solutions of Lancaster, New Hampshire, a leader in tamper evident packaging continues to invest heavily in the latest equipment to expand and target new industries, including food & beverage. The custom packaging printer has completed a \$7 million expansion, investing in state-of-the-art converting and printing equipment. At the center of this expansion is a new Koenig & Bauer EVO XD Eight-color Press. The press is augmented by additions of a new laminator, slitter and converting lines, creating a one-stop solution for all our client needs. "This investment provides PAK Solutions with state-of-the-art custom printing and converting solutions, with efficient high-speed, flexible production, quality and expanded capability. This allow us to bring to our partnership with our clients the latest technology and the gold standard in print and production capability." says PAK Solutions' President, Kevin Powers.

PAK employs on-site design services, partners with CSW, Inc. premedia services and takes a client-centric approach to give clients the option of handing off a job from start to finish. Clients know PAK Solutions for their partnership model, acting as an extension of their clients with packaging design, prototyping and manufacturing operations. They meet the clients' needs versus fitting in a box of pre-determined solutions. "This kind of service made PAK Solutions a leader in tamper evident and other packaging. Now we're ready to show more clients and industries our ability with these expanded capabilities," says Patrick Judge, President of Operations.

### **CONTINUED INNOVATION:**

PAK Solutions has a history of continued innovation. A small group of owners purchased the company in 2017 with 18 employees. The company has invested significantly in expanding and upgrading its capabilities within its core areas of competence in flexible packaging including its printing and converting capability and now employees 55 individuals. They're on a continued course of growth and investment. With its new press, PAK Solutions can now offer:

- High quality printing up to 175-line screen in process colors including the expanded gamut
- 1,640 ft./min web speed
- 61" maximum web width with a 59" wide print area
- Automatic impression, registration and color monitoring with 100% web inspection (leveraging K&B's AIF & ARF Automatic Register Flexotecnica technology)
- Fully-integrated operator touch screens that include main control, registration, web inspection, ink viscosity, & wash-up system

We are interested in hearing from Food & Beverage and other industries. If you're a production manager, procurement manager, CFO, owner or other, we look forward to hearing from you.
